I just got your album "Up Against It" and wanted to let you know I think it is great. It's so nice to see someone else out there making the kind of music this world needs more of. Keep up the good work!!! My wife works in an independent CD store and has put your album on the "Roots Rock" listening station. She already sold three in the past two days.

BTW, do you ever tour? I live in North Carolina and would love to check you out live.
